

ANKIT RAJKUMAR DUBEY

Senior Functional Consultant | Enterprise SaaS | PLM & Analytics

Pune, India | +91 9987287808 | ankitdubey1708@yahoo.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Enterprise software professional with 4+ years at PTC, specializing in Windchill PLM customer engagement, functional solution design, and data-driven analysis. Proven track record acting as the primary liaison between Fortune 500 enterprise customers and engineering teams across North America and Europe translating complex business requirements into structured solutions, driving root cause resolution, and feeding insights back into product roadmaps. Skilled in SQL analytics, Power BI reporting, and cross-functional stakeholder management. Currently pursuing Executive PG in Product Management (IIM Ranchi) and AI Product Management certification (Product Space), combining domain depth with a sharp product mindset.

PROFESSIONAL EXPERIENCE

Product Specialist — Enterprise Customer Solutions | [PTC Software, Pune](#) Dec 2025 – Present

- Serve as primary technical and functional liaison for enterprise customers across North America and Europe, leading end-to-end incident lifecycle management from requirements capture through solution deployment and post-implementation review.
- Conduct structured root cause investigations using Java thread dump analysis, SQL query optimization, and system diagnostics — delivering solution designs that influenced code-level fixes in Windchill 13.1, improving product stability.
- Drive cross-functional coordination across engineering, product, and customer stakeholder teams — managing escalation paths, runbook execution, and executive-level stakeholder communication within SLA constraints.
- Contribute functional feedback to the Windchill product roadmap based on recurring enterprise customer pain points identified during implementation support cycles, bridging the gap between customer needs and product evolution.

Product Analyst — Data & Customer Insights | [PTC Software, Pune](#) Nov 2024 – Nov 2025

- Analyzed enterprise customer usage patterns and recurring failure modes using SQL and telemetry data, delivering structured, data-backed recommendations to R&D and product teams — directly influencing product improvement priorities.
- Improved Software Problem Report (SPR) turnaround time by 30% through process standardization, escalation path redesign, and knowledge management frameworks — demonstrating measurable operational impact at scale.
- Built Power BI dashboards and Excel-based reporting frameworks to track SLA adherence, customer health metrics, and incident trends across enterprise accounts, enabling data-driven decisions for the product and support teams.
- Facilitated requirements gathering sessions with enterprise customers, documenting functional specifications and translating business needs into structured problem statements for engineering review.

Associate Product Analyst | [PTC Software, Pune](#) May 2022 – Oct 2024

- Developed and maintained Knowledge Handling Content (KHC) documentation, creating structured functional guides that enabled frontline teams to resolve enterprise customer issues with greater consistency, improving first-contact resolution.
- Conducted technical enablement sessions for 10+ junior engineers — designing training content, presenting implementation scenarios, and building team capability for handling enterprise-grade Windchill configurations.
- Elected Employee Advisory Council member representing the Pune team — gathering cross-functional stakeholder feedback and collaborating with the Pune Director to drive workplace and process improvements.

Associate Software Engineer (Internship) | [Ness Digital Engineering](#) Jan 2022 – Mar 2022

- Completed structured training in Linux fundamentals and front-end technologies, contributing to software engineering and debugging practices on development projects.

EDUCATION & CERTIFICATIONS

Executive Postgraduate Program, Product Management Jun 2025 – Jun 2026 (Expected)

IIM Ranchi | Covers Product Strategy, User Research, Roadmapping, Data-Driven Product Decisions

AI Product Management Program 2025

Product Space | Covers AI/ML for PMs, Prompt Engineering, LLM Product Strategy, AI-driven Analytics

BE, Computer Engineering (AI Honours) 2018 – 2022

Savitribai Phule Pune University — Zeal College of Engineering & Research

CORE COMPETENCIES

Enterprise Implementation & Solution Design • Requirements Gathering & Functional Specification • Customer Stakeholder Management
Root Cause Analysis & Problem Solving • Data Analysis & Reporting (SQL, Power BI) • Cross-functional Coordination
Product Roadmap Feedback • AI/ML Concepts (Prompt Engineering, NLP) • Agile / Scrum • SLA & Operational Readiness

TECHNICAL SKILLS

Enterprise Platforms: Windchill PLM 11.0 -13.1 • Knowledge Handling Content (KHC) • CLM/Supply Chain exposure

Analytics & Reporting: SQL • Power BI • Excel • PowerPoint

Infrastructure: Apache/Tomcat • Solr • Microsoft Active Directory • SSL fundamentals

AI / ML: Prompt Engineering (basics) • NLP concepts • AI-driven analytics tools

Design & Prototyping: Figma • API/Webhook understanding • Whimsical

Programming: Java (basics) • HTML • CSS

ACHIEVEMENTS & RECOGNITION

- Team of the Year Award, PTC (2024) — recognized for driving incident management improvements and measurable team performance outcomes across enterprise accounts.
- Multiple customer 'Applause' recognitions for high-impact enterprise incident resolutions and consistently responsive stakeholder communication across North America and Europe.
- Elected Employee Advisory Council Member — representing 100+ Pune team members and driving cross-functional workplace improvements in collaboration with senior leadership.
